The UAB Bone Marrow Clinic

Treating blood disorders and cancers cannot be done alone. It requires the strong will of a patient, the support of a family, and the compassion and expertise of a world-renowned health care team.

Since the UAB Bone Marrow Transplantation and Cell Therapy Program opened in 1991, over 1,700 transplants have been performed. We have dedicated each day to lead with innovation and serve with compassion, along with the most advanced treatment methods in a comfortable, cutting-edge facility. Each patient is treated by a team of health-care professionals dedicated to his or her care throughout the transplant process. We are constantly building a work environment of professionalism where each person is valued and respected

Founded in 2005 " Pro Start is a tremendous and unprecedented opportunity for students. They will have direct exposure to great athletes and other professionals who have already succeeded on the field and Corporations, and can now pass down their experience and wisdom. These professionals can serve as real-world role models both in athletics and life".
